

WALL INSTALL TEMPLATE

DETAILS:

Standoff Supports / Finish Options

WSM2525-M6 AL
Satin Anodized Aluminum Finish – fittings are treated through anodizing process that converts the aluminum surface into a decorative, durable, corrosion-resistant, anodic oxide finish.

WSM2525-M6 SS
Natural Stainless Steel Finish – machined using high-grade stainless steel then brushed for a satin texture.

WSM2525-M6 BL
Black Anodized Aluminum Finish – fittings are treated through anodizing process and surface is coated with a black satin/matte finish.

Single Medium-Size Panel-Frame Configuration for Multiple Inserts

Acrylic collage frames are supplied as a set with 1/4" thick "clear, frost, matte white, or matte black" acrylic panel for use as backing and 1/8" thick "non-glare" overlay acrylic panel for use as front cover. Panels are drilled for M6 studs and mounted with 1" diameter standoffs projecting 1" from wall surface. Photo inserts are mounted in between the two front pieces of acrylic and fixed in place with low-tack (3MTM 9415PC Removable Repositionable) double sided adhesive tape.

Note: Non-glare (non-reflective) acrylic front cover helps to reduce the glare and provides a mild protection against harmful UV rays.
