

WALL INSTALL TEMPLATE

DETAILS:

Single Large Panel Configuration with Individual Multi-Photo Frames Standoff-Projected

This large display board option involves front sandwich acrylic frames designed to hold multiple photo inserts in a regular grid, mounted to a larger panel with projecting standoffs or flush caps. The back panel comes in 1/4" thick "clear, frost, matte white, or matte black" acrylic. The individual photo frames are supplied as a set with 1/8" thick "clear" acrylic back and 1/8" thick "non-glare" acrylic front cover. The large panel is drilled for M10 studs and mounted to wall with 1" diameter standoffs projecting 1" from wall surface. Photo inserts are mounted in between the two front pieces of acrylic and fixed in place with low-tack (3MTM 9415PC Removable Repositionable) double sided adhesive tape.

Note: Non-glare (non-reflective) acrylic front cover helps to reduce the glare and provides a mild protection against harmful UV rays.
